FINE HANDMADE GUITARS

SPEC SHEET

SUPERBLEN FOR MUSIKHAUS ÖLLERER Serial no.960702

Neck: Laminate of quartersawn rock maple and Brazilian mahogany glued into body. Neck dimensions are larger than standard to handle the six strings.

Body: Brazilian mahogany hollowed out with carved arched top of figured black walnut

Fingerboard: Extra large selected Indian ebony, more than two octaves long. Scale length is 1170mm (41.5"). ebony nut. 30 Dunlop 6120 frets

Machines: Six Schaller BM black.

Bridge: Custom made rock maple/cedar laminate with height adjustment. Built in Highlander piezo pickup

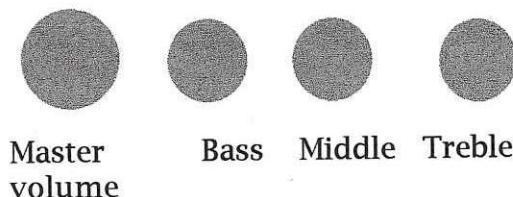

Circuitry: Chris Larkin Custom, three band active EQ hard wired stage module. Cut and boost of 12dB at 60Hz, 600Hz and 4KHz. Highlander pre-amp, for the Highlander piezo

Finish: 12 coats of hand rubbed 2 pack, AC silk lacquer. Wire wool and wax finished.

Strings: Tomastik Weich with added low B (S41) and high C (S35).

Controls:

Neck
Side

Master Volume:

Bass, mid and treble: 12dB active cut and boost at selected frequencies.

Comments: The active circuits are powered by a single 9 volt battery which is housed under the back cover. Insertion of the jack plug switches on the power to the active circuit so remove the jack plug when the bass is not in use to preserve battery life.

*This bass was specially made by hand to the specification of
a weird customer of Musikhaus Öllerer.*
